A Colossal Threat ☆

Retrieve the Colossus Attack Specs and Colossus Defense Specs and bring them to Boulder'crag the Rockshaper at Boulder'crag's Refuge.

- Colossus Attack Specs
- Colossus Defense Specs

Relevant Locations

The entirety of this quest happens in **The Storm Peaks**.

Description

You've done an excellent job of delaying the work on the iron colossus, but I fear we've only made the stormforged more determined to complete the weapon.

Even now, they're bringing in new laborers and the overseers push them to the limit. We may not be able to keep them from bringing the colossus online, after all. Return to Narvir's Cradle, to the south and find the documents detailing the colossus' offensive and defensive abilities. They should be near the tents and forges on the bottom level.

Just to clarify, the item that gives you the quest is https://www.wowhead.com/wotlk/item=42394 The sample is the quest item you gather. I'm sorry i can't link it with the name. I'm not sure how to set that, but you get the idea.

Note: If your like me and try make it too quick, you may forget to kill some Stormforged War Golem to grab the item that start a quest: Dark Armor Plate... If you do not get the quest item and complete the quest you will NOT be able to pass to the next part of chain.

That is not true or has been fixed. The quest item dropped for me after having completed step 4 (see below).

Thx, I forgot how to go on this quest chain when I was leveling my alter, and I KNEW it had to be more quests, because I had already done them with my main char.

idk why the Dark Armor Plate is mentioned here; in WotLK classic, it already dropped in the earlier stages of the chain, while doing ❗ Facing the Storm. no need to worry about that any more.

At the tents at the big giant robot.

With a giant robot that size it would be better to say what part of the robot it's near.... left toe? left pinky toe? right foot? I found the attack specccs at the tents that the stormforged don't seem to use (2 tents you'll prolly pass by on your way into the cradles from the quest giver) and the defense specccs were by the southern stormforge and that awkward pillar.

Actually the Defense Specs are underneath the canopy, which is just west of the above mentioned awkward pillar.

Confirmed. Those without coordinates, READ THIS.

I found the defense spec near the two canopy-esque tents near the Colossus's feet, and found the attack spec near an actual tent north of the Colossus.

These are lootable within a druid's birdform. Druids do not have to bother with the shifting out then back in and can avoid mobs.

If you fly around, you'll see them fairly easily. I was able to grab both required items to complete the quest without ever getting attacked by flying in next to the item, dismounting and grabbing it.

Easiest quest ever.

Easy to see the loot sparkle while flying about 5-10 yards off the ground.

Subject: "Location"

These items spawn in the same area as the lighting totems that you destroyed on a previous quest (~29,45)

Don't be like me and wait at the Colossals. They **DO NOT** do any moves that you would observe. Don't be silly like me and wait at them for awhile, the Attack Specs and Defense Specs are like pieces of paper, and look like maps almost. (coming from the air they do.) You can see them from the air, and they are **"Attack Specs 28.9 44.0"** and **"Defense Specs 30.0 45.7"**
